

Discover the power of our vacuums cleaner

Vacuum cleaners are on the boundary between brooms and conventional canister vacuums. These devices are cordless and bagless, allowing you to dusting small areas in a matter of minutes. There are several types of brush depending on the surface to be cleaned), a suction motor and a tank.

Today's vacuum cleaners are very powerful, easy to handle and silent. They are also used in homes as the main Hoover. Vacuum cleaners are popular for their portability, ease of use and high suction power. They have benefited from technical advances in recent years: now all or most of them use a cyclonic technology, they have gained in autonomy, they are dimensioned and lightened. Every corner of the house becomes accessible, especially the stairs.

Discover our vacuums cleaner

With the HKoenig UP690 wireless 2-in-1 vacuum cleaner PowerFlex, you clean the corners that are hard to reach. Equipped with a removable aluminium tube, it allows you to clean under furniture, Hoover up the dust with from cupboards, etc.

HKoening Company profile

In 1960, a modest German hardware dealer named Helmut Koenig took advantage of the post-war industrial boom to set up his own household appliance workshop.

Within a short period of time, products such as hoovers and food processors became popular and Mr. Koenig became well known.

He then decided to work in collaboration with local factories in order to have a more dense production. His company quickly grew to a national level and later, his products will be sold all over the world.

The brand is now owned by the French company ADEVA. The HKoening products are known worldwide for their reliability. The brand is specialised in household appliances. It was one of the first brand to sell bagless hoovers that also sucked up dust mites.

What that unites all the brand's products is their high standards. The main criteria that HKoening wants to defend are quality, innovation and design. Its products are quite diverse, as you can find in the catalogue everything from misters to as well as kettles and even wine cellars.
